Asset Fineline windows & doors sit perfectly by the pool

Sheerframe approved fabricator Asset Fineline has completed the manufacture and installation of doors and windows for one of the most spectacular conservatories built in the UK in recent years.

Providing an enclosure for a luxury swimming pool at a private residence in Kent, the project involved more than 50 Sheerframe 7000 system PVC windows and 12 pairs of Sheerframe PVC doors. The high specification windows and doors incorporate enhanced security hardware, including multi-point door locking systems and hinges, and energy efficient toughened glass units.

Given its position adjacent to a grade II listed brick wall in the Victorian garden of the house, the overall aesthetics were extremely important to satisfy local planners. Asset Fineline achieved the excellent results using the Sheerframe 7000 system, which is designed specifically to match the style of traditional British Windows.

Darren Sowter, Commercial Sales Manager of Thetford-based Asset Fineline says, "Construction of this pool enclosure was an extremely ambitious project and one that we are very proud to have completed. With a number of trades on-site at any one time, it was a real benefit that the Sheerframe windows and doors were very easy to assemble with the roof system and this minimised any problems during installation."

Asset Fineline has been an approved fabricator for the Sheerframe system from L.B. Plastics for more than 15 years and has established itself as one of the leading window and door companies in the southeast.

In addition to its exclusive projects in the residential and new build sectors, Asset Fineline also works extensively in the commercial market and is a key provider to RSLs (Registered Social Landlords).
