Stylish student outlook with Sheerframe

Sleek, modern and stylish windows from Asset Finline have played a crucial role in delivering a state of the art student accommodation complex on Birmingham's Bristol Road. In conjunction with Ocon Construction, Asset Finline has fabricated and installed almost 800 high performance Sheerframe tilt-only windows in two stylish grey tones - light grey and anthracite - to complement the modern design of the 604-bedroom student complex. Ocon Construction, says, "The accommodation is a modern development in design, construction and aesthetic appeal. With a 18-storey glass and zinc tower as the focal point of the building, the two-tone grey windows blend perfectly with the overall aesthetics, adding to the contemporary, urban building design." Bristol Road is one of the first developments in the UK to use the revolutionary new Corefast system, which offers rapid on-site assembly of lightweight modules using Bi-Steel panels to form the core framework. Using the technically advanced architectural PVC window system from Sheerframe, the windows were directly installed into the structure utilising galvanised steel fixing lugs. Darren Sowter, Asset Finline's Commercial Sales Manager says, "We are delighted to be working with Ocon Construction on such a landmark building. Contemporary design is becoming increasingly important within the construction industry and this project demonstrates how well architectural PVCu windows meet modern aesthetic, safety and security requirements." "On this particular development the two-tone grey windows offered the desired contemporary look externally, with the Sheerframe window system providing high performance, thermal efficiency and low maintenance — offering the perfect combination."

Asset Finline's installation for Ocon Construction in Birmingham, delivering contemporary window styling with the performance benefits of the Sheerframe system.
