Asset Fineline's timely school refurb spans the hemispheres

Sheerframe approved fabricator Asset Fineline Windows has completed a major window refurbishment project at a Victorian primary school located right on the Greenwich Meridian Line, as part of its ongoing work with Greenwich Council.

The Meridian School has been transformed with Sheerframe 7000 system PVC vertically sliding sash and casement windows, which have brought the 19th century building up to 21st century safety, security, energy and comfort standards without losing the original look of the building.

The refurbishment was required at the school, which is adjacent to the former Greenwich Naval College, after its timber windows had deteriorated to an irreversible degree following years of exposure in the urban environment.

Asset Fineline manufactured nearly 300 Sheerframe PVC windows and devised and implemented an installation programme in conjunction with the school designed to minimise disruption to teaching. Having already completed a number of schools projects for Greenwich Council, Asset Fineline installed windows in priority areas of the building during the holiday period and ensured plant and equipment was used to maximum economic efficiency during a progressively phased completion Programme.

David Suttle, head teacher at Meridian School says, "The window refurbishment programme resulted in very little disruption for staff and students and yet the school building has been transformed. The new windows have made a real difference to the quality of the learning environment and we are delighted with the results."

The Meridian School project is the fourth major refurbishment contract that Asset Fineline Windows has completed for Greenwich Council over the last 36 months using Sheerframe. One of the most widely used systems in all types of school buildings throughout the UK, the advanced Sheerframe PVC window and curtain walling system from L.B. Plastics provides windows with the highest energy efficiency standards, combined with excellent long term performance and stylish good looks in virtually any style.

New Sheerframe 7000 system PVC tilt and turn windows (on the lower windows) and casement windows at Meridian School, Greenwich, manufactured and installed by Fineline Windows.
